Forecast for Thursday 04 Aug 2022

Weather: Any early morning mist and fog lifting early morning. Variable amounts of cloud during the morning with bursts of sunshine here and there and perhaps the odd light rogue shower, particularly in the west of the region. The cloud will break and clear more robustly during the afternoon with mostly clear skies developing widely.

Chance of cloud-free hill tops above 600m: 60% chance increasing to 90% from early afternoon.

Low cloud and visibility: Early morning mist will limit visibility initially but as these lifts, visibilities widely becoming very good. Cloud banks present on some windward slops during the morning with bases from 500-600m. Cloud will lift and break up during the morning with bases mostly above the summits from late morning.

Meteorologist's View

Cloud banks on some slopes and summits during the morning will make navigation challenging at times. Given the damp conditions and the risk of showers, waterproofs will also be advisable. During the afternoon conditions will improve with strong sunshine across the park, so sun protection will also be a necessity.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Tue 02 Aug 2022	5.6mm	5.6mm	15.2mm

Forecast for Friday 05 Aug 2022

Weather: After a fresh start Friday it will be a fine and dry day across the Brecon Beacons with plenty of strong sunshine. Some cloud may bubble up during the afternoon leading to hazier skies.

Maximum wind: Northwesterly 10-15mph with isolated gusts to 25mph.

Chance of cloud-free hill tops above 600m: 90% throughout.

Low cloud and visibility: Visibility generally excellent with distant hills and summits visible. Cloud bases well above the level of summits throughout.

Temperature: **Valleys:** Plus 8 Celsius rising to Plus 22 Celsius.
At 600m: Plus 7 Celsius rising to Plus 21 Celsius.
Freezing level: Well above all summits.
